PROFESSIONAL SUMMARY

Java Backend Developer with 3+ years of professional experience in designing, developing, and maintaining scalable backend applications and microservices. Strong expertise in **Java, Spring Boot, Spring Cloud, Spring Security, REST APIs, Hibernate, JPA, Kafka, RabbitMQ, Redis, MySQL, PostgreSQL, and AWS**. Experienced in microservices architecture, API development, database optimization, authentication and authorization, caching, asynchronous processing, cloud deployment, production support, and troubleshooting of enterprise applications. Strong understanding of **OOP, SOLID principles, LLD, and Design Patterns**, with knowledge of **Large Language Models (LLMs) and Spring AI**.

TECHNICAL SKILLS

Programming: Java 8/11/17, Groovy, Python, SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Batch, Spring Cloud, Spring AOP

Architecture: Microservices, REST APIs, SOAP, API Gateway, Feign Client, Event-Driven Architecture

LLD & Design: Object-Oriented Design, SOLID Principles, Low-Level Design (LLD), Design Patterns, Factory, Strategy, Builder, Singleton, Observer

Messaging: Apache Kafka, RabbitMQ, Asynchronous Messaging

Databases: MySQL, PostgreSQL, Oracle, MongoDB, Redis, OpenSearch, Elasticsearch

Cloud & DevOps: AWS EC2, ECS, S3, RDS, Lambda, WAF, CloudWatch, IAM, Docker, Git, GitHub Actions, Maven, Gradle

Security: OAuth2, JWT, RBAC, SSL/TLS, Spring Security, AWS WAF

AI / LLM: Large Language Models (LLMs), Spring AI

Tools: Swagger/OpenAPI, Postman, IntelliJ IDEA, Eclipse, JSON, XML, SFTP

WORK EXPERIENCE

JusTransform

Feb 2024 – Present

Software Engineer – Java Backend Developer

Remote, India

- Designed and developed scalable **Java microservices** using **Spring Boot, Spring Cloud, and REST APIs** for an enterprise B2B SaaS integration platform.
- Applied **LLD, SOLID principles, and Design Patterns** to design maintainable, modular, and scalable backend components.
- Implemented secure authentication and authorization using **Spring Security, OAuth2, JWT, and RBAC** across backend services.
- Developed an **OpenSearch-based search module** for Business IDs, improving search accuracy and reducing API response latency.
- Implemented **Redis caching with TTL-based eviction**, reducing database load and improving response time for frequently accessed APIs.
- Worked on **LookupV3 migration from MongoDB to MySQL**, including data access changes, query optimization, and backend service modifications.
- Configured and managed **AWS WAF and IAM policies** to improve application security and control unauthorized traffic.
- Handled production issues through debugging, log analysis, root-cause analysis, and timely resolution of critical backend incidents.
- Participated in Java application modernization and version migration while maintaining application stability and backward compatibility.

Alignbits LLC

May 2023 – Jan 2024

Software Engineer – Java Developer

Remote, India

- Developed and maintained **RESTful APIs and microservices** using **Java, Spring Boot, and Spring MVC** for multiple client integrations.
- Built **Groovy-based integration services and ETL pipelines** for data transformation, processing, and system-to-system integration.
- Implemented **Spring Batch jobs** for large-scale data processing and automated backend workflows.
- Investigated and resolved production issues using debugging, log analysis, root-cause analysis, and performance troubleshooting.
- Developed unit and integration tests using **JUnit 5 and Mockito** to improve backend reliability and maintainability.
- Optimized **MySQL and PostgreSQL queries** using indexing, query analysis, and database performance tuning.

EDUCATION

Bachelor of Engineering (B.E.)

2018 – 2022
